

6516204944.txt

I have been a truckdriver for 26 years. I'm sure other drivers have stated what i'm about to. Where was this invention 30 years ago. You do not lose stations. You can here the same channel from west to east, north to south. The weather channel and road channels are needed. I cannot beleive ANYONE would try to take this satellite radio off the air. It's great not having all the commercials. Just music, talk shows, NASCAR and sports. The way it is suppose to be. Please do not take my XM.

Sincerly,
Mike Hemminger
Medfrod OR.
